Put your cards on the table

The classic in a dual role - an elegant case that doubles as a practical card dispenser which can be set up at two different angles. It offers a classically sleek and refined look, with a material mix of imitation leather and burnished stainless steel. The only question remaining is: do you lay your cards on the table, or stand them there? It's up to you!

The economic wonder car.

There are legends that bring a smile to everyone's face. This is one of them. The VW Transporter T1 - affectionately called Bulli - was a key to the German economic miracle in the 1950s. As a key chain, LIGHT BULLI T1 1962 is a wonderful memory - very engaging and wonderfully old-fashioned. With the white LED light you snap right into the present. Making him even more loveable on the doorstep in the dark.

TAP TO BRAINSTORM - with KREATIV-EI and the 6-3-5-Method!

And so you go:

Step 1: You're looking for 6 employees, colleagues, friends & teammates. Explain the problem and give everyone a blank sheet of paper on which you can draw 3 columns.

Step 2: Lights on! Tap the KREATIV-EI and start the brainstorming session. Everyone has 6 minutes to write an idea down in each of the 3 columns.

Step 3: Lights out! The KREATIV-EI gives the signal after 6 minutes to pass your idea sheet to the next person.

Step 4: Repeat step 2: Tap the KREATIV-EI and the next round begins, however, this time you're expanding on the ideas from the last round.

Steps 5 to ...: After 5 rounds it's game over. The paper is full, heads are empty and the problem is, hopefully, solved.

A tip: Of course you can use KREATIV-EI as a timer or night light, but honestly, who is coming up with such an idea?

Light on.

Vroamm! Using the KREATIV-EI, brainstorming is achieved according to the new 6-3-5 method. Gentle pressure on the egg is enough for the light to go on - precisely 6 minutes. Enough time to get 3 good ideas on paper. Once the light goes out, the next round starts. Pass the paper on, revise the ideas and repeat 5 times. And always pay attention to the light - it is enlightening and helps with the brainstorming.
